

Vaccinopathy

Is it a Medical Delusion?

Mothers!

What profiteth your babies to live if their God-made blood is periodically and perpetually *tainted* with pus-vaccine?

Who is your physician?

Does he worship at the medical shrine of vaccinopathy? Is his creed or method of preventing and curing disease the *infliction* of *vaccinosis*?

Is your doctor a *vaccinopath*? Do you believe in vaccinopathy?

Definitions

Vaccinopathy is a medical method of treating health and disease by inducing vaccinosis.

A *Vaccinopath* is a doctor who practices and believes in vaccinopathy; one who seeks to prevent and cure diseases by infecting or inoculating the well and sick with bacterial poisons called 'vaccines'.

Vaccinosis is a blood contamination intended to develop in the healthy a modified form of any contagious or infectious disease; a bacterial disease empirically 'given' the well person as a preventive, and the sick as a curative, therapeutic measure.

To *Vaccinose* is to introduce a blood-infection where none exists lest one might develop or be 'caught' or 'carried'; to cause a blood-infection where one already exists in the hope that the morbidic poison, virus, vaccine or bacteria may antagonize or conquer the body-poisons or live germs.

Physicians believe and teach that they can prevent diseases by making the well sick and cure diseases by making the sick *sicker*. Do you?

Health is more priceless even than freedom

There is no despot like sickness. You may make this world "safe for democracy," but this world *will not be safe to live in* as long as from the cradle to the grave the people are made the victims of the prevailing loathsome inoculations with vaccines and bacteria. All true Americans must help to estop our governmental policy of poisoning the blood of babies and grownups with putrid stuff.

An official exposé

as well as elucidation, of this the most vitally important subject, barring not even world peace, before the American people today is presented in a pamphlet on "vaccinopathy." *This pamphlet is educational, costs you nothing. WRITE FOR IT.*
